

OBI.SMSLocks-Install.zip - contains the MSI install (and a setup.exe, if required).

OBI.SMSLocks-Source.zip - contains the source code Visual Studio 2010 project for the application and the installation project.

Review the README.rtf for additional information regarding making changes to the executable's associated configuration file (in the application directory) to suit your environment.

[OBI.SMSLocks.exe.config]

Refer to the white paper for details on setting up the supporting Google Voice, Gmail and Spreadsheet for the application.

Windows Service

If you elect to use the windows service to run the application, the recommended 'LogLevel' is '1', which will output process information and error information to the Windows Application logs as 'OBISMSService'. The service appears as 'OBI.SMSLocks'.

If using as windows service, you may want to change the 'Startup Type' as 'Automatic' [in Start - Run - Services.msc]. Additionally, you may want to set the options on the 'Recovery' tab in the service's properties to 'restart the service' on all failures with a 'reset fail count' of 1 day and a 'restart service after' 0 minutes.
